Paper No.

A32

I hereby request access under 37 CFR 1.14(a)(1)(iv) to the application file record of the above-identified ABANDONED application, which is identified in, or to which a benefit is claimed, in the following document (as shown in the attachment):

United States Patent Application Publication No. \_\_\_\_\_, page, \_\_\_\_\_ line \_\_\_\_\_,

United States Patent Number 6,497,872, column \_\_\_\_\_, line, \_\_\_\_\_ or

WIPO Pub. No. \_\_\_\_\_, page \_\_\_\_\_, line \_\_\_\_\_.

**Related Information about Access to Pending Applications (37 CFR 1.14):**

Direct access to pending applications is not available to the public but copies may be available and may be purchased from the Office of Public Records upon payment of the appropriate fee (37 CFR 1.19(b)), as follows:

For published applications that are still pending, a member of the public may obtain a copy of:

- the file contents;
- the pending application as originally filed; or
- any document in the file of the pending application.

For unpublished applications that are still pending:

- (1) If the benefit of the pending application is claimed under 35 U.S.C. 119(a), 120, 121, or 365 in another application that has: (a) issued as a U.S. patent, or (b) published as a statutory invention registration, a U.S. patent application publication, or an international patent application publication in accordance with PCT Article 21(2), a member of the public may obtain a copy of:
  - the file contents;
  - the pending application as originally filed; or
  - any document in the file of the pending application.
- (2) If the application is incorporated by reference or otherwise identified in a U.S. patent, a statutory invention registration, a U.S. patent application publication, or an international patent application publication in accordance with PCT Article 21(2), a member of the public may obtain a copy of:
  - the pending application as originally filed.

File Information Unit

This collection of information is required by 37 CFR 1.14. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. BRING TO: File Information Unit, Crystal Plaza Three, Room 1D01, 2021 South Clark Place, Arlington, VA.

#### ABSTRACT

The invention provides methods of transplanting multipo-  
tent neural stem cell progeny to a host by obtaining a  
population of cells derived from mammalian neural tissue  
containing at least one multipotent CNS multipotent neural  
stem cell; culturing the neural stem cell in a culture medium  
containing one or more growth factors which induce mul-  
tipotent neural stem cell proliferation; inducing proliferation  
of the multipotent neural stem cell to produce neural stem  
cell progeny which includes multipotent neural stem cell  
progeny cells; and transplanting the multipotent neural stem  
cell progeny to the host. Also provided are methods of  
transplanting neural stem cell progeny to a host by obtaining  
an in vitro cell culture containing CNS neural stem cells  
where one or more cells in the culture (i) proliferates in a  
culture medium supplemented with one or more mitogens,  
(ii) retains the capacity for renewed proliferation, and (iii)  
maintains the multipotential capacity, under suitable culture  
conditions, to differentiate into neurons, astrocytes, and  
oligodendrocytes; and transplanting the one or more cells to  
the host.
